A new level in performance.

Hello and welcome to Greenplay Australia. It's here you'll find the world's best synthetic turf, and discover what an amazing difference it can make to your sporting club, your home, your commercial property, your school, or any other venue that requires a safe, pristine surface. We know you'll be impressed by the technology, the quality, the realism, and, most importantly, the performance.

We can transform your environment by providing you with the complete synthetic turf service. We do everything – consult, design, supply, install, and also offer a whole range of landscaping services, from paving to putting in swimming pools.

We've had many years experience in the synthetic turf and landscaping industry, and we know what's good and what's not. That's why we use

eco-friendly, Limonta Sport synthetic turf – the realism, quality and performance is outstanding. It is also more forgiving than real turf, making it safer to play on.

Greenplay Australia is synonymous with quality and client satisfaction. The reason for this is simple – we use the best materials, and our people take a lot of pride in what they do. After all, there is a lot of satisfaction in creating fantastic new sports facilities, transforming homes, building safer playgrounds, and generally improving people’s environments.

In everything we do, Greenplay Australia offers you a new level in performance.

greenplay australia

Our star player.

Created from the finest quality, eco-friendly materials developed in The Netherlands, and manufactured in Italy, the pedigree of Limonta Sport synthetic turf is unsurpassed.

Since 1981, Limonta Sport has been producing cutting-edge synthetic turf for all kinds of outdoor and indoor sports. Today, you'll find our products in over 17,000 clubs across 70 countries, including soccer powerhouse, AC Milan. Limonta Sport is approved by all governing bodies, and is one of only five FIFA preferred producers.

It also exceeds our tough Environmental Standard ISO 14001

Limonta Sport has extraordinary permeability, stays cool, is UV resistant, and chosen throughout the world for its:

Durability and Resilience

Safety (Flexible, non-abrasive surface)

Realistic Appearance

Outstanding performance in all kinds of weather

All Limonta Sport products are tested for shock absorption, deformation, traction, and ball roll. The company also has its own research and development laboratory where products are constantly monitored, and looked to be improved upon.

LIMONTA SPORT REPRESENTATIVE FOR AUSTRALIA

limonta sport

Putting our best foot forward.

When it comes to playing outdoor sport, you want a surface that is safe, performs brilliantly in all weather conditions, and keeps looking great with very little maintenance. Greenplay is more than ready to meet that challenge. We have a surface for every outdoor sport.

The Limonta Sport range covers everything from tennis courts and golf greens to soccer and hockey pitches. Each surface is specifically created for a particular sport using variations in the length and shape of the synthetic fibres (and the way they are stitched together) and then combining it with an appropriate infill.

The Limonta Sport range of abrasive-free, synthetic turf consists of:

Sports Pro Hybrid

Sports Pro Max S

Sports Pro MF Diamond

Sports Pro Newgrass

Sports Pro Xpert

All these surfaces are made from the highest quality materials, and precision-manufactured in Limonta Sport's fully automated facility in Italy. They are continually tested for durability, resilience, stability and performance.

outdoor surfaces

We have your outdoor sport covered.

Sports Pro Hybrid

Limonta Sports has developed an artificial grass that's alive! It's amazing, but true. After years of research, a special species of natural grass has been successfully combined with a synthetic turf to produce the ultimate in playing surfaces – Sports Pro Hybrid. The grass is colonised through the synthetic turf in an organic infill, creating a hybrid surface that has the durability and performance of synthetic grass, and the texture and feel of the real thing.

To players, the surface is real grass, but the synthetic fibres provide much more stability, pressure distribution, vibration dampening and impact absorption than the natural alternative. And, because the organic infill is deeper, water is retained at a greater rate, helping the natural grass to thrive. Sports Pro Hybrid is permeable, helping the surface to retain its integrity (virtually no deformation or compaction) even under high-use conditions.

Sport Pro Max S

Only Limonta has the amazing Sport Pro Max S. Recognised as the leading synthetic turf in the world market, Sport Pro Max S boasts unrivalled performance and resilience. The unique, double S-shaped yarn (350 microns thick) creates an extremely natural looking and performing surface, with true ball-roll and traction. The surface is soft and virtually abrasion proof.

Sport Pro MF Diamond

Made from 100% polyurethane monofilament yarn (220 microns thick), the durability of Sport Pro MF Diamond is unsurpassed. Inter-weaving two different shades of green, the 'Diamond' shaped yarn looks unbelievably natural, and provides a soft, abrasion-free surface. This is a high-impact, high-use surface.

We have your outdoor sport covered.

Sport Pro Newgrass

This is the most versatile synthetic surface, using a variety of fibres, structures, and infill materials to cater for sports-lovers and professionals alike. From tennis courts to hockey pitches, Sport Pro Newgrass complies to the highest international standards.

Sport Pro Xpert

Using a unique 'Xtreme' polymer yarn (240 microns thick), Sport Pro Xpert utilises laser technology and special extrusion lines to guarantee higher resistance and greater performance. It consists of a monofilament twisted around a fibrillated fibre, increasing 'tuft lock' resistance by an average of 39% on conventional monofilament surfaces. Sport Pro Xpert is one tough synthetic turf.

What lies within

The Sport Pro range of synthetic turf looks beautiful from above, but it's what lies within that makes it feel beautiful and perform like no other surface. Scattered in the turf is a layer of Quartz Sand that helps stabilise the surface and facilitate drainage. This is mixed with Limonta Sports' amazing eco-friendly InfillPRO GEO (or a variety of recycled, polymer-based infills) to cushion the surface, and make it much safer to play on. The result is a pitch that can be used all day, 365 days a year. It is totally compatible with any studded football shoe, and the risk of injury is significantly reduced.

Surface vs Sport

It's amazing what a difference a blade of synthetic turf can make – the shape and weave, and type of infill it's mixed with determine things like ball roll, traction, durability and resilience. The Sport Pro range has subtle, but significant, variations that suit various kinds of sport.

Surface vs Performance

All Limonta Sport synthetic turf is of the highest quality, and the Sport Pro range is one of the few approved by all international sporting bodies. As a general rule, the high performance surfaces (like Sport Pro Max S) tend to be more resilient and less durable than the 'everyday' surfaces.

Durability

Durability is a measure of how tough and long-lasting the surface is. The way the synthetic turf is woven and attached to the base dictates durability.

Surface vs Performance

Surface	Hybrid	Max S	Diamond	Newgrass	Xpert
Durability					
high					
very high					
extremely high					
Resilience					
high					
very high					
extremely high					
8 Year Guarantee	•	•	•	•	

Resilience

Resilience is a measure of how true the surface remains, and how well the turf springs back into place. This is to do with the shape of the synthetic blades, and what they're made of.

Guarantee

Sport Pro surfaces come with an 8-year guarantee that completely covers any manufacturing or installation faults. This assumes, of course, that the surface has been used for its intended purpose (using correct footwear and equipment) and that has been properly maintained.

A full list of conditions can be found at greenplay.com.au

Fill your team with confidence.

Not only does Limonta Sport boast a range of world-class artificial surfaces, it also has the revolutionary InfillPRO GEO – an organic infill that is ideal for both sport and recreational uses. The composition of this amazing product guarantees better technical and sporting performances. InfillPRO GEO enhances the playing surface, improves safety and is environmentally friendly.

Having InfillPRO GEO makes a big difference on many levels. That's because it's:

Recyclable – it can be recycled for agricultural use and is economical to remove.

Odourless – it is a natural organic product that is odourless and micro organism proof.

Lower Temperature – unlike rubber infill, the natural properties keep the temperature of the surface down, very much like natural grass.

UV Resistant – its natural properties make it highly UV resistant, and that means it won't deteriorate quickly.

Performance – it has the effect of creating very grass-like performance, both in ball bounce and feel.

Stability – the stability is markedly improved with InfillPRO GEO, creating sure-footedness, and instilling confidence in athletes.

Abrasion Free – it makes the surface act like grass, virtually eliminating abrasions from falling or sliding.

Optimal Drainage – its organic consistency facilitates optimal drainage, even in bad weather conditions.

InfillPRO GEO

Rising to the challenge.

The toughest opposition in indoor sport can sometimes be the surface you're playing on. Unforgiving, slippery floors make it hard to compete at your best, and are often the cause of injury. That's why it's important to have a safe, responsive surface. And that's why we use the Limonta Sport range of PVC indoor surfaces.

Limonta Sport has specific applications for all kinds of indoor sports (as well as multi-purpose surfaces). Great lengths are taken to make sure these surfaces perform at the highest level, allowing players to safely perform at theirs.

Made from eco-friendly raw materials, the Limonta Sport range of indoor surfaces feature:

High Shock Absorption

High Performance Grip and Stability

Uniform Ball Bounce

High Resilience and Durability

Greater Playing Comfort

SANALIM Anti-bacterial and Fungicide Treatment

ULTRA TOP Light Deflecting Finish

The result is an immaculate, durable surface that improves performance and is totally safe to play on.

If you want your indoor team to play at their best, they have to play on the best – Limonta Sport.

- 1. ULTRA TOP** – this polyurethane finish deflects light, reduces foot prints, and increases resilience and durability.
- 2. Calendered Crystal Layer** – this layer provides the perfect balance between adherence and slipperiness, increasing stability and instilling confidence in every player.
- 3. High Concentration Colour Layer** – A choice of vibrant colours in a resilient layer that makes the surface look as good as it performs.
- 4. Fibre-glass Reinforcing Layer** – another layer that increases stability, resilience and durability.
- 5. Foam Support Layer** – the base layer that helps balance performance with safety.

For permanent hygiene, all layers are given SANALIM anti-bacterial and fungicide treatment.

Whether you're looking for a specific or multi-purpose surface, we have what you need. Our attention to detail and inclusive, personal service coupled with the cutting edge technology of Limonta Sport products means we can give your school, club or organisation a truly professional finish – one that will deliver a new level in performance.

Looking great all year round.

In many parts of Australia, having lush green lawn all year round is becoming more and more difficult. Lack of rainfall and water restrictions have had a severe impact. That's why there is a growing trend towards artificial lawn, and that's why we have the Limonta Sport Deluxe range. Now you can have a maintenance-free, lush green lawn that looks great all year round. The benefits are hard to ignore:

Very realistic appearance – you need to touch it to make sure it isn't real.

Save money – reduce your watering and sell the mower.

Very safe – non abrasive, forgiving surface.

Keeps looking good – very durable and UV resistant (so it won't fade)

The Deluxe range is available in four different grades to give you flexibility in use and appearance:

Deluxe Max

Deluxe Max has unlimited applications. Its two-tone matt finish, and exclusive S-shaped blades create an unbelievably natural look and feel.

Deluxe Tuscany

Deluxe Tuscany is ideal for roof tops, terraces and pool areas. It's a high-density combination of straight and curled yarn that requires no infill, and is available in four shades of green.

Deluxe Adelaide

Deluxe Adelaide is a second option for roof tops and pool areas. It is also available in four shades of green, and represents a fantastic value as well as great looks.

Deluxe Curl

Deluxe Curl is the 'Aussie Summer Lawn'. Created from the exclusive S-shaped yarn, a small amount of brown is mixed with the green, giving a more muted, native appearance.

Greenplay also offers you the complete landscaping service, and can transform your outdoor area into a beautifully integrated part of your home and lifestyle. We design, supply and install paving, decking, pergolas, retaining walls, swimming pools, sunken fire-pits, and just about anything else you could imagine in your garden.

residential landscaping

It's all about image.

Just as Greenplay can work wonders with people's homes, the same can be achieved with commercial property. The Deluxe Range (see Residential Landscaping) from Limonta Sport can be applied to a wide variety of commercial applications. For example:

Streetscapes – lift the presence of any new land development.

Kindergartens – create a magical environment that is very safe.

Rooftop Gardens – create a relaxed atmosphere that everyone enjoys

Playgrounds and Reserves – design fantastic public areas that will fulfill any council's compliance on safety and quality.

Entrance Foyers – make a green statement about your business.

And, of course, Limonta Sport is the eco-friendly choice in synthetic turf.
